

PHILANTHROPY / SPONSORING NO WATER NO US - 2026

No Water No Us is a powerful awareness project founded by **Malek Semar**, entrepreneur and international advocate for water access. Born and raised in a village without running water or electricity, he turned his personal history into a global mission: reminding the world that water is not a resource like any other, it is the foundation of life, dignity, and peace. No Water No Us mobilizes citizens, institutions, artists, and athletes to raise awareness about water scarcity and to promote concrete, sustainable solutions for access to clean water worldwide.

More than an NGO, No Water No Us is a universal message: **without water, there is no humanity**. By combining advocacy, education, and real-world action, the movement aims to reconnect humanity with its most essential common good.

No Water No Us (NWNu), a non-profit organization under French law Loi 1901, works daily to raise awareness and act for water. Supported by committed partners, NWNu uses art and sport to unite communities while leading international solidarity initiatives, specifically by equipping schools. Our goal aligns with that of all committed organizations to address major social, environmental, and ethical challenges. **Children for Water**, our ongoing campaign, aim to equip 10,000 schools globally.

Through our conferences, ambassadors, and meetings, we are seeking for partners to join us in this high-impact initiative. Your support would be beneficial for both of us. We look forward to working together in alignment with your CSR policy. The support counterpart will depend on the type of support offered, which could include free donations, involvement in one of our events, assistance for a field action, or support from a global partner, among others.
